**506858**

- According to new market trends, impeller will now be made from steel sheet instead of Aluminium.

Old version

New version

**506861**

- Design has evolved in accordance to the most recent OEM version.

Old version

New version

**506988**

- Following the industry trend for this housing, allowing it to be used in other pumps that require that **cut on the evaporation chamber**, we'll be updating our housing with that purpose.
- The evaporation chamber volume won't be changed, it will only affect the exterior of the chamber, giving the pump **more clearance** with other componentry.
