

THE MAGNAFLOW ADVANTAGE

Direct-Fit Converters Features & Benefits

Comprehensive EPA & CARB Coverage

Keeping the Light Off Since 1981

We design, manufacture, coat and test our catalysts in-house to exceed CARB and EPA standards, ensuring low emissions compliance

16-GAUGE 409 STAINLESS STEEL TUBING

409 Stainless Steel

- » Highly corrosion resistant, maintains the same strength and corrosion resistance as OEM parts

16 Gauge Wall Thickness

- » Strong and rigid, making it less susceptible to catastrophic damage

MULTI-PIECE DESIGN

Easier Installation

- » No cutting, bending or welding required
- » Save time and money on install
- » Shops can turn bays faster making more money
- » Gaskets and Hardware Included

Swaged & Notched Slip-Fit Connections

- » Eliminates air gaps, simplifies pipe connections, and ensures easy serviceability for part replacements
- » Included band clamps strengthen pipe connections, ensuring a secure, leak-free seal for exhaust system integrity and efficiency

Ships In A Box

- » Less likely to be damaged, avoiding returns
- » Smaller packaging foot print, saving money on shipping

SPUN BODY DESIGN

Replicates Latest OE Technology

- » Compact low mass design for greater thermal efficiency & compliance
- » Replicates OE design essential for proper fitment, form & functionality
- » Single laser fusion weld to provide a longer leak-free operation with fewer required welds

410 STAINLESS STEEL HANGERS

410 Stainless Steel

- » Highly corrosion resistant, saves on additional costly repairs due to hanger failure

Matches OE Hanger Diameter

- » Proper fitment, performance & longevity of surrounding exhaust components
- » Barbed style hangers matching OE characteristics

STAMPED MERGE COLLECTORS

Does Not Increase Backpressure

- » No impact on fuel economy
- » No loss in engine performance

Does Not Increase Heat Concentration

- » Reducing probability of premature part failure

MULTI-PIECE DESIGN

Easier Installation

- » No cutting, bending or welding required
- » Save time and money on install
- » Shops can turn bays faster making more money
- » Gaskets and Hardware Included

Swaged & Notched Slip-Fit Connections

- » Eliminates air gaps, simplifies pipe connections, and ensures easy serviceability for part replacements
- » Included band clamps strengthen pipe connections, ensuring a secure, leak-free seal for exhaust system integrity and efficiency

Ships In A Box

- » Less likely to be damaged, avoiding returns
- » Smaller packaging foot print, saving money on shipping

MANDREL BENDS

Does Not Increase Backpressure

- » No loss in fuel economy
- » No loss in engine performance

Consistent Diameter

- » Reduces heat concentration
- » Structural integrity maintained
- » Replicates OEM flow characteristics

409 STAINLESS STEEL TORCA CLAMPS

Exclusive Reaction Block

- » Pipe does not distort with 360° equal clamping force
- » Installation flexibility

1.25" Wide Clamping Surface

- » Tight seal avoiding damaging exhaust leaks
- » Strong hold, reducing the possibility of coming free and damaging the converter

308 STAINLESS STEEL MIG WELDS

308 Stainless Steel

- » Highly corrosion resistant, ensuring the welds maintain their strength throughout the life of the part

Robotic Welds (where applicable)

- » Consistent quality results
- » Eliminated damaging pinhole leaks that oftentimes aren't identified until after install
